Contractual Research and Teaching Faculty – LRU

Component: Center for Teaching and Research in Computer Science - CERI

Location: Jean Henri Fabre Campus - Agroparc

CNU Section: 27

Department: CERI

Research Unit: LIA

Recruitment Rate: 100% - 192 teaching hours/year

Start Date: 02 June 2025

Contract Duration: renewable for the AI4CI project until 12/02/2027

Computer Science - Master SYRIUS and AI4CI

Contract Specifics: The position is funded by the AI4CI Master's program (Artificial Intelligence for Connected Industries), an international master's program partially based on the local SYRIUS master's program (Cloud Infrastructures & Distributed Systems).

Required Skills: the selected candidate must have a PhD in Computer Science and demonstrate strong teaching and pedagogical skills, supported by experience in higher education or an equivalent setting. Additionally, the candidate must be able to integrate into the CORNET research team of LIA.

Required Degree: PhD

Teaching: the recruited candidate will teach computer science courses within the CERI Master's programs, particularly SYRIUS and AI4CI, and support the coordination of these programs.

Research: the recruited candidate will actively participate in research projects within LIA's CORNET team, focusing on: Network and cloud systems, Virtualized network systems, Cloud and edge computing technologies

Application Process

Required Documents:

Candidates must submit:
- A detailed CV (including research work, list of publications, and teaching experience)
- A motivation letter
- A copy of the required degree
- PhD thesis report and defense details
- A valid identification document

Submission Deadline: **March 6, 2025**

Applications must be submitted electronically via the following platform:
